EDUCATION

Singapore University of Technology and Design (SUTD)

Sep 24 - Present

Bachelor of Engineering, Engineering Product Development | Electrical Engineering Track, AI Minor

Singapore

- cGPA: 4.2/5.0 | SUTD Global Merit Scholarship
- Relevant Coursework: Circuits & Electronics, Computational & Data-Driven Engineering, EM & Applications, Systems & Controls
- APEX Club Vice President; spearheaded a cross-university SG60 kayaking event with SMU, NUS and NTU

Jurong Pioneer Junior College (JPJC)

Jan 20 - Dec 21

A' Levels

Singapore

- RP: 86.25 | H3 Physics (Semiconductor Devices) with NTU
- Quartermaster of Guitar Ensemble; represented JPJC at Singapore Youth Festival (Certificate of Commendation)

SKILLS

- **Programming Languages:** Python, C, C++, SQL
- **Libraries & Frameworks:** pandas, NumPy, Plotly, Streamlit, scikit-learn
- **Hardware & Design Tools:** Arduino, KiCad (PCB Design), AutoCAD, Fusion360, CST Microwave Studio
- **Development Tools:** Git, GitHub
- **Languages:** English, Mandarin

WORK EXPERIENCE

VisionPower Semiconductor (VSMC)

Sep 26 - Present

Data Analytics Intern | Manufacturing, Operations

Singapore

- Created 5+ production Power BI dashboards consolidating fab-wide lot history and live WIP into real-time views for manufacturing operations
- Authored 4-tier action-urgency ranking, stalled-tool flags, and conditional-formatting rules spanning 8 process areas, prioritizing line-engineer response to at-risk lots
- Queried manufacturing execution system data (300k+ rows) with SQL to feed dashboard fields such as remaining process steps and equipment-recipe matching
- Automated daily equipment rate and recipe-matching reports for fab operations

UOB Kay Hian

Mar 24 - Sep 24

Operations Assistant

Singapore

- Reconciled dividend announcements for 500+ client accounts across securities and corporate-action events

PROJECTS

SUTD Engineering Design Innovation Project

May 26 - Aug 26

Flat Industrial Automated Mobile Robot (Falali)

Singapore

- Designed and fabricated arm-subsystem PCB in KiCad (schematic, layout, 3D model) for a Ramatex textile factory robot
- Programmed ESP32-S3 embedded firmware as a finite-state machine orchestrating arm motion, clamping, and sensor sequences, integrated with teammates' wheel-drive and rail modules

Personal Project

Nov 25 - Feb 26

Stock Portfolio Tracker

Singapore

- Engineered a Python-based automated data pipeline integrating Moomoo's OpenD API to retrieve and process daily portfolio data
- Designed a SQLite database schema to persist and query historical portfolio metrics and transaction records
- Built an interactive Streamlit interface with Plotly visualizations, benchmarking portfolio returns against major world indices via Yahoo Finance API
- Packaged as a one-command daily refresh re-benchmarks against world indices at each market close

SUTD Course Project

Jan 25 - May 25

3D Printed Bird Deterrent Device

Singapore

- Applied design thinking to develop an Arduino + PIR sensor-triggered bird deterrent for open-air canteen contamination
- Fabricated prototype through woodworking and iterative design; awarded the Sustainability Practice Prize
